Email:

ranjith.kumar0951@gmail.com

Address:

408/1, Kaveri Nagar,
Murugesh Pallaya, Bengaluru,
Karnataka – 560017

TECHNICAL EXPERTISE

Skills:

Python, Pandas, Numpy, Matplotlib, Seaborn, Docker, Scikit Learn, Machine Learning and Data Science

Framework:

Flask, Sk-Learn, tensorflow and keras

Database:

MySQL, PostgreSQL, MariaDB

Supervised Algorithms: Decision Tree, Random Forest, Naive Bayes, K-Nearest Neighbour, Support Vector Machine, Logistic Regression, Linear Regression.

Unsupervised Algorithms: Isolation Forest, Kmeans, Hierarchical Clustering, DBScan

Documentation Tools:

MS Office, MS Excel, MS Power Point

Tools:

Git, Jira, Bugzilla, Freshdesk, Nagios, Zabbix, Confluence

Company Name:

Innoviti Technologies Pvt Ltd

Complete Solutions in SAP- 2015 to 2016

PROFESSIONAL SUMMARY

- **10+ Years** of IT Experience in Application Development, Banking Domain, Payments & Retail Sector.
- Worked as Team Lead in Product Development & Deployment.
- Skilled professional in Data Engineering and Data science.
- Excellent knowledge on Banking & Finance domain, in identifying the opportunity and services offered.
- Experienced in working as Scrum master and maintaining the scheduled deadlines.
- Defining the Business problem, architecting the solution with statistical analysis, feature scaling and feature engineering.
- Handling different analytics use case from initiating, conceptualization and design.
- Create and present innovative solutions, proof of concept and present findings with actionable recommendations to management.
- Good and practical Knowledge in Software Engineering and Database Management System.
- Good Knowledge in monitoring and alerting in the database system and production server.
- Expertise in leading the team for Project Coordination, Strategic Communication, Problem Solving and Client Issue Resolution.
- Worked in ETL tools of Pentaho and SSIS integration in data pipeline.
- Experienced in Tableau visualization and charts to the management team in improving the Business.
- Expertise in Design and Documentations.

WORK EXPERIENCE PROJECT - I

Product : Sparcs Portal

Technologies : Python, JavaScript, React, Tableau

Tools : PyCharm, WinSCP, Putty, Jira

Description : Sparcs Invoicing to generate automatic file to Finance team for billing on monthly basis to the external Merchants. Generating Transaction and settlement report. Tableau integration and echargeslip.

Roles & Responsibilities carried out in above Projects:

- Database Designing and conceptualize the schema architecture.
- Monitoring daily scripts being executed through crontab.
- Invoice generation on monthly basis to Finance team for billing to the Merchant and reconciling the data.
- Developing API's scripts based on the requirements.

WORK EXPERIENCE PROJECT - II

Product : Churn Prediction

Technologies : Decision Tree, Random Forest, SVM, Python

Tools : Visual code, Spyder, Jupyter, PostgreSQL

Description : Predicted churn stores from the historical data for new merchants. Before getting churn Business team reaches merchants to identify the problem and increase in the business profitability.

Roles & Responsibilities carried out in above Projects:

- Used supervised algorithms to get the best fit line
- Predict the stores which is having low transactional volume and last transactional date from the historical data and help the business team to avoid the churn for new merchants.
- Data Exploratory Analysis to clean the data with missing value treatment and imputation technique.
- Visualizing the data by use of matplotlib and seaborn library.

WORK EXPERIENCE PROJECT - III

Product : Customer Review system

Technologies : NLP, Python

Tools : Visual code, Spyder, Jupyter, PostgreSQL

Description : Based on customer review, we need to identify the areas of improvement and giving some EMI discounts for unsatisfied customers.

Roles & Responsibilities carried out in above Projects:

- Used BOW and TFIDF Algorithms to create the model.
- Used Decision Tree and Gaussian Algorithm to get the best fit line.
- Unstructured Data to structured data using Vectorization, NLU and NLG Techniques.
- Used Porter stemmer and WordNetLemmatizer.

WORK EXPERIENCE PROJECT - IV

Product : Data Engineer and Data Analyst

Technologies : Python , ETL(Pentaho & SSIS), Tableau

Tools : Visual code, Spyder, Jupyter, PostgreSQL

Description : Created ETL for data visualization in Tableau. Fetching the data from production database and stored in another database for visualization.

Roles & Responsibilities carried out in above Projects:

- Created packages and projects in SSIS based on the dimensions and facts data.
- Created various reports in Tableau based on the business requirements for visualization.
- Scheduling the automatic email from SSIS package and cron job for ETL.
- Data cleansing and analyzing based on the requirements..

EDUCATION QUALIFICATION

Year 2015	●	Adhiyamaan College of Engineering Hosur. Percentage: 86% B.E/ECE
	●	Pre-University Education (PUC)
Year 2011	●	Sri Vijay Vidyalaya Matric HR Sec School Dharmapuri Percentage: 90.5%
	●	Sri Sathya Sai Matric School, Krishnagiri
Year 2009	●	Percentage: 91%

DECLARATION

I, **Ranjith Kumar**, do hereby declare the above furnished information is true to the best of my knowledge and belief.

Place :Bengaluru

Date :

Yours Sincerely
(Ranjith Kumar R)
